---

## SUMMARY

I am a Information technology undergraduate with a strong understanding of computer science principles. I am capable of working as a solo developer but excel at working in a team environment. Currently seeking full-time opportunities to further enhance my abilities in a safe and healthy working environment.

---

## WORK EXPERIENCE

### Software Engineer Intern - LECO (Pvt).Ltd

Aug 2024 - Present

- Developed a Java application using JDBC to retrieve customer data from an Oracle database, generate XML output as per client specifications, and save it locally with dynamic tag creation and data formatting.
  - Developed and deployed REST APIs using Node.js and Express, ensuring high performance and scalability.
  - Migrated and optimized microservices architecture using Docker and API Gateways for seamless backend operations
  - Maintained and debugged company systems, implementing corrections and improvements to ensure optimal performance and reliability
  - Participated in client meetings to discuss project requirements and maintained specific projects, ensuring alignment with client needs and timely issue resolution.
  - Backend development using Node.JS
  - Participated scrum meetings and practiced development methods.
- 

## EDUCATION
